Erledigt macOS Partition zerschossen? Alles futsch?

Beitrag von „al6042“ vom 26. Juni 2017, 18:13

Ich bin an der DSDT dran.
Nach entfernen der beiden Fehler hatte ich nur folgendes Bild:

Compiler Summary

Line	Code	Message
3558	3130	Result is not used, possible operator timeout will be missed
4453	3136	Non-hex letters must be upper case (pnp0c14)
8136	3115	Not all control paths return a value (PR2S)
8257	3115	Not all control paths return a value (_PS0)
8385	3115	Not all control paths return a value (_PS3)
8560	3122	Called method may not always return a value
8579	3122	Called method may not always return a value
8601	3122	Called method may not always return a value
8620	3122	Called method may not always return a value
8642	3122	Called method may not always return a value
8661	3122	Called method may not always return a value
8688	3122	Called method may not always return a value
8707	3122	Called method may not always return a value
8729	3122	Called method may not always return a value
8748	3122	Called method may not always return a value
8770	3122	Called method may not always return a value
8789	3122	Called method may not always return a value
8811	3122	Called method may not always return a value
8830	3122	Called method may not always return a value
8852	3122	Called method may not always return a value
8871	3122	Called method may not always return a value
8893	3122	Called method may not always return a value

0 Errors, 39 Warnings, 78 Remarks, 156 Optimizations

Schaut als Grundlage schon mal gut aus...
