- Summary

VoodooHDA is an open source audio driver for devices compatible with the High Definition Audio (HDA) Intel specification.

It is designed as an Intel replacement only for AppleHDA on Mac OS X with support for a wide range of audio controllers and codecs.

Method-1 Clover UEFI / ESP

This will gives you a choice to install VoodooHDA kernel extension in ESP /EFI/CLOVER/kexts /

10.14/10.13/10.12/10.11/10.10/10.9/10.8/10.7/10.6

The kext will be injected by Clover

Method-2 Clover Legacy

You can also install VoodooHDA kernel extension in

10.14/10.13/10.12/10.11/10.10/10.9/10.8/10.7/10.6

The kext will be injected by Clover.

Method-3 Classic

Classic Method of 10.6 to 10.14

This Install VoodooHDA.kext + AppleHDADisabler.kext in System / Library / Extensions.

A backup of the AppleHDA.kext kext will be done automatically.

For all methods mention VoodooHdaSettingsLoader.app

install in Applications and VoodooHDA.prefPane in

Library / PreferencePanels

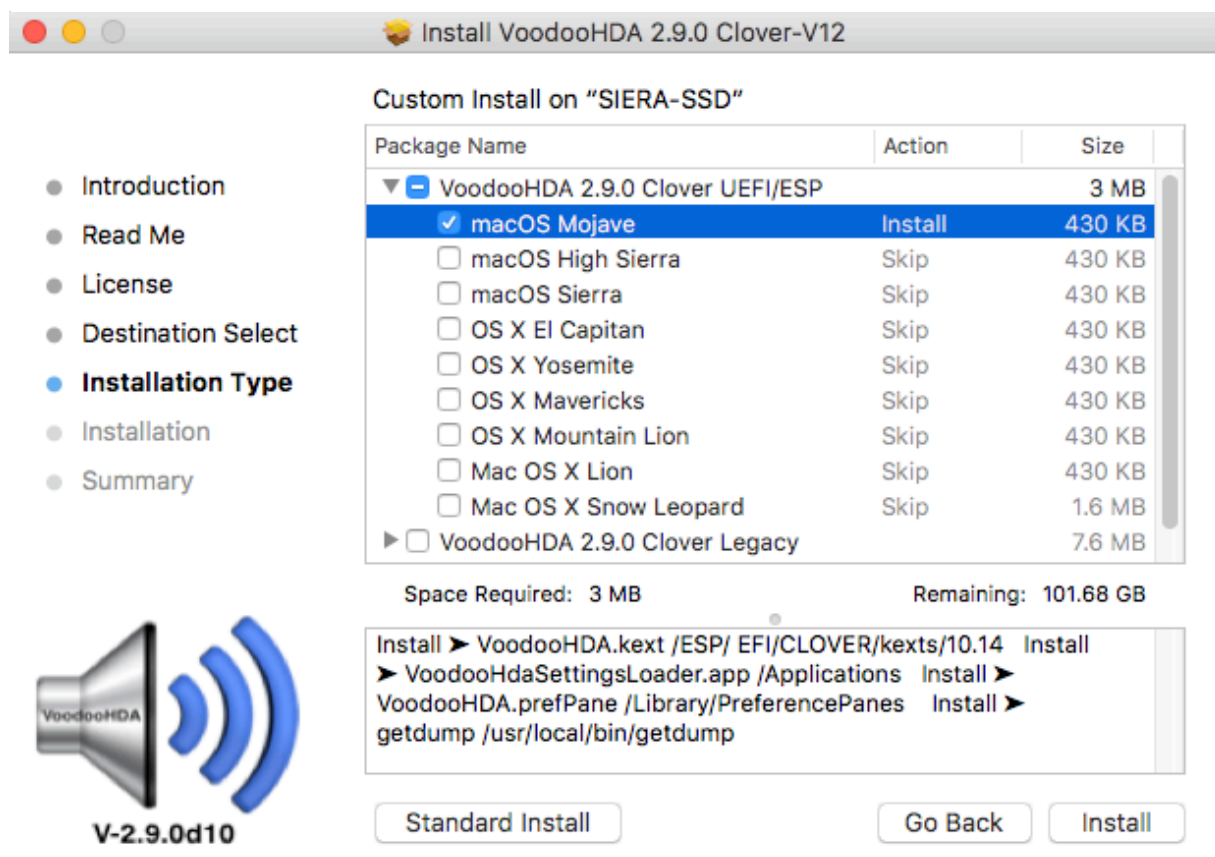

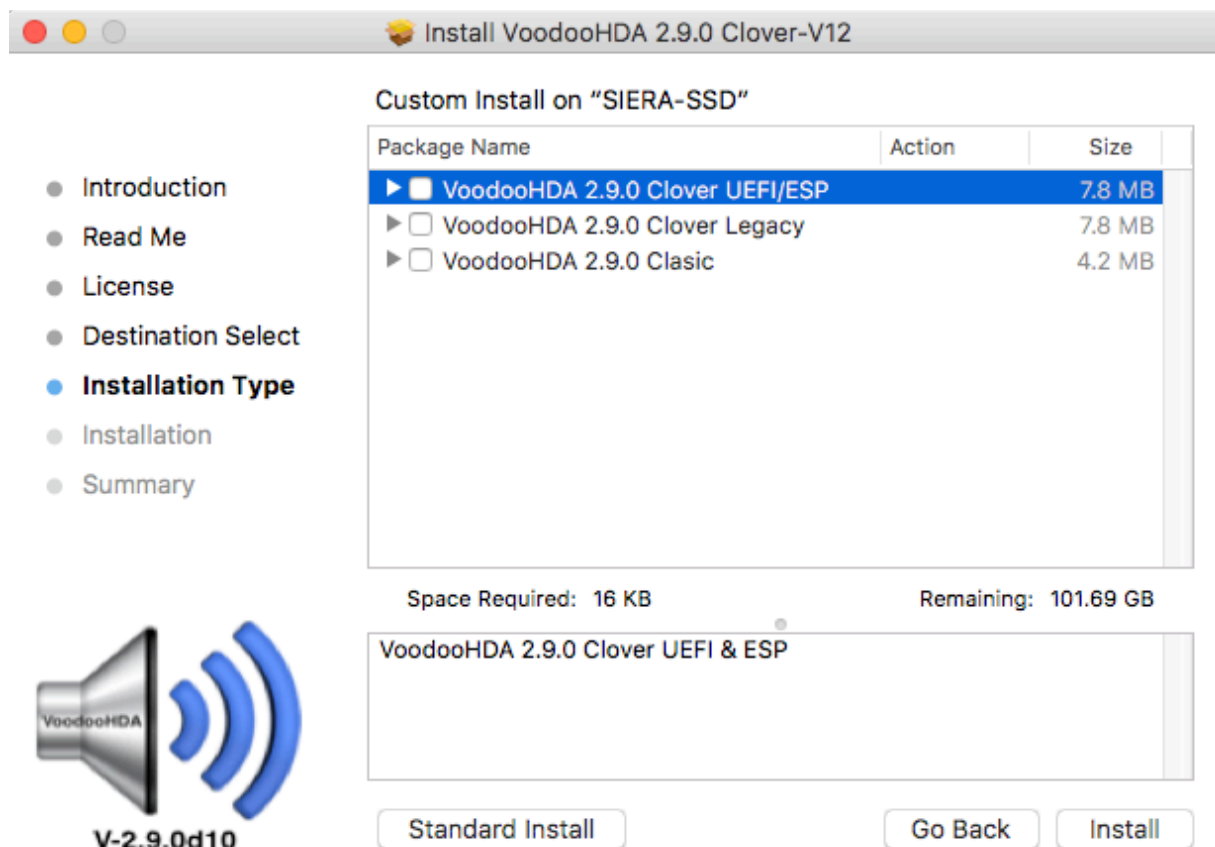

Also install getdump in usr / local / bin / getdump.

V-2.9.0d10

Go Back

Continue

Instructions:

- You need Existing Clover V2.4k. This does not install Clover, it will install only VoodooHDA and the other required components to its proper function.

Method-1 for Clover UEFI /ESP

- This program can install VoodooHDA kernel extension on ESP (EFI System Partition) / EFI/CLOVER/kexts/10.14/10.13/10.12/10.11/10.10/10.9/10.8/10.7/10.6
- It's up to you to choose witch one. The kext will be inject by Clover

Method-2 for Clover Legacy

- This program can install VoodooHDA kernel extension on /EFI/CLOVER/kexts/ 10.13/10.12/10.11/10.10/10.9/10.8/10.7/10.6
- It's up to you to choose witch one. The kext will be inject by Clover

Method-3 Clasic Method

- You can also select Clasic method for 10.6 to 10.14
- This will install the VoodooHDA.kext + AppleHDADisabler.kext on /System /Library / Extensions
- This will install also VoodooHdaSettingsLoader.app on Applications and VoodooHDA.prefPane on Library / PreferencePanes

getdump

- getdump is installed on usr/local/bin/getdump for all the methods mentioned

VoodooHDA.prefPane

- For all OS X System VoodooHDA.prefPane is installed on Library/PreferencesPanes

Usage: Download the Latest Release [Download ► [VoodooHDA 2.9.0-V12](#)]
Choose the option you want, install and reboot.

Verry important to Reboot for the changes to be applied.
