## Ständig Fehler in der Konsole

Beitrag von „Seth86“ vom 29. Januar 2014, 22:19

Hallo,

nach gefühlten 1000 Installationen mit unterschiedlichen Bootloadern bin ich jetzt bei [Ozmosis BIOS](#) gelandet. Die Installation hat auch gut geklappt, das System scheint so erstmal gut zu laufen. Wenn ich allerdings in die Konsole schaue tauchen dort ständig " Fehler" auf:

beim Surfen mit Safari:

Ist das normal, oder kann ich etwas dagegen tun, das sieht ja nicht so aus, als ob alles "super" läuft.

vielen dank für eure Hilfe
