

Fire wire port lost after multiple reboot

Beitrag von „Schneelöwe“ vom 26. Januar 2012, 22:37

You don't need Pacifist to search on the dvd after the next files you need. Just open the DVD in Finder and navigate on the DVD to System/library/extension and search there after Firewire 😊

Pacifist is only needed if you want to search after files that are in the Combo/Delta Updates from Apple.
