## Hackintosh stürzt ab beim Kopieren

Beitrag von „iKai“ vom 21. November 2014, 15:40

```
21.11.14 15:32:15,775 WindowServer[123]: WSGetSurfaceInWindow : Invalid surface
603042142 for window 70
21.11.14 15:34:18,000 kernel[0]: AppleSRP started.
21.11.14 15:34:19,000 kernel[0]: ASP_TCP CheckReqQueueSize: increasing req queue from 32
to 128 entries. so 0xfffff8028559000
21.11.14 15:34:19,000 kernel[0]: ASP_TCP ReadDSIHeader: setting atten bytes of 0x8000
21.11.14 15:34:19,000 kernel[0]: ASP_TCP do_thread_read: no reqInfo found for reqID 256
21.11.14 15:34:19,314 KernelEventAgent[66]: tid 54485244 received event(s)
VQ_SERVEREVENT (2048)
21.11.14 15:34:19,315 NetAuthSysAgent[353]: ERROR: AFP_OpenSession - Login failed with 80
21.11.14 15:34:19,315 sharingd[209]: 15:34:19.314 :
SDSharePointBrowser::handleOpenCallBack returned 80
21.11.14 15:34:23,000 kernel[0]: ASP_TCP CheckReqQueueSize: increasing req queue from 32
to 128 entries. so 0xfffff8025702000
21.11.14 15:34:49,664 mds[32]: (Volume.Normal:2464) volume:0x7fcf9c8f6000 *****
Bootstrapped Creating a default store:1 SpotLoc:(null) SpotVerLoc:(null) occlude:0
/Volumes/Data
21.11.14 15:35:41,000 bootlog[0]: BOOT_TIME 1416580541 0
21.11.14 15:35:43,000 syslogd[17]: Configuration Notice:
ASL Module "com.apple.AccountPolicyHelper" claims selected messages.
Those messages may not appear in standard system log files or in the ASL database.
```

Danach kommt ganz normaler wieder der Bootvorgang.

Die erste Zeile kommt oft hintereinander.
