Windows 8.1 doesn't show up in Ozmosis GUI or in BIOS

Beitrag von „al6042“ vom 31. Januar 2015, 01:55

Oh...

that is something completely different.

Your OS X is installed on a GUID partition which name will be shown in Ozmosis or the UEFI-based BIOS, while your Windows installation sits on a MBR Partition.

MBR will not be shown in BIOS by there partition names, but with the name of the harddrive itself...

So, if you know the name of the harddrive which contains your windows install, pick that and you're done
