## **Windows 8.1 doesn't show up in Ozmosis GUI or in BIOS**

**Beitrag von „neoyoli“ vom 1. Februar 2015, 22:28**

Thanks for the guidance! 👍

Update: Sorry to come back to this, but I deleted the Defaults.plist file, yet Ozmosis GUI still shows up at boot, then OS X boots automatically, just like before I deleted it. I even set UserInterFace back to true before deleting. What could be the problem?
