# Neu Neu nur bei uns in Deutsch.....Neue Ozmosis Anleitung für neue Version

**Beitrag von „al6042“ vom 3. März 2015, 20:48**

I think I found it...

there were a couple of entries which didn't make any sense in that combination, so I deleted the following:

Code

1. `<key>UserInterface</key>`
2. `<true/>`
3. `<key>TimeOut</key>`
4. `<integer>3</integer>`
5. `<key>DisableAtiInjection</key>`
6. `<true/>`
7. `<key>AtiFramebuffer</key>`
8. `<string>dummy</string>`
9. `<key>DisableNvidiaInjection</key>`
10. `<false/>`
11. `<key>DisableIntelInjection</key>`
12. `<false/>`
13. `<key>DisableVoodooHda</key>`
14. `<false/>`
15. `<key>DisableBootEntriesFilter</key>`
16. `<false/>`
17. `<key>AAPL,snb_platform_id</key>`
18. `<integer>42</integer>`
19. `<key>AAPL,ig-platform-id</key>`
20. `<integer>42</integer>`

Alles anzeigen

If you know put the file back into the /EFI/EFI/Oz Folder of the hidden EFI-partition, you have to first do the NVRAM-Reset with

Reset NVRAM | Option+Command+P+R | From either the F12 menu, Ozmosis GUI, Shell or BIOS Setup.

After that the system will reboot again and you should see the Hermit Crabs Boot Logo before it starts further to OS X...

Good Luck
