[HowTo] Surface Pro ONE & Yosemite 10.10.2 (v1.6.10 - Januar 2015 AppStore Release)

Beitrag von „Ghostbuster“ vom 20. März 2015, 11:35

Hmm... Sound-Problem, welches?

Type-Cover sollte mit plug-and-play funktionieren!

Sometimes y can get glitches in sound if the system boot up without injecting the SYSTEM-ID.
This a known bug in clover self. If it's happened, just reboot again.

The Type-Cover is plug-and-play - no driver nothing.

because step by step to find out your specified configuration - What you done else?
