Ozmosis für GA-B75TN möglich ?

Beitrag von „al6042“ vom 5. Mai 2015, 23:57

Check out the Readme section from tuxusers Ozmosis 1479 GitHub site,
You can add those variables into the defaults.plist on the hidden EFI-partition in the folder
/EFI/Oz.

Just execute the following command in Terminal

Code

1. defaults write com.apple.DiskUtility DUDebugMenuEnabled 1

Open disk utility and find "show every partition" in the new debug menu.

Then You would be able to mount the hidden partition and edit or create the defaults.plist,,,
