

# **OS-X-Fake-PCI-ID kext-injection von RehabMan**

**Beitrag von „QSchneider“ vom 31. Juli 2015, 18:43**

thats quite ok, just mention it next time and type your questions in english.

if you use osmozis with the board you mentioned, you usually don't have to use fakepciid at all.

If do have a special need for using fakepciid, please open another thread and describe your configuration so far and problems in detail.

thanks
