## **El Capitan popping sound (iMac 14,2)**

**Beitrag von „MacGrummel“ vom 5. August 2015, 22:46**

I've just a real good Sound-Kext for Your Hackintosh. It is the Original from the Quo-Board, running with all ALC892-Sound on Z77 und Z87 Boards without any problems. Take the Version 10.9 for all new OS X..
