## **Problem after install DP4 and Beta 2 on Ozmosis**

**Beitrag von „mosconi“ vom 7. August 2015, 16:28**

Thank you crusher

just added

```
<key>csr-active-config</key> <data>ZwAAAA==</data>
```

**on my Default.plist then boot and on terminal:**

```
sudo touch /System/Library/Extensions  
sudo kextcache -prelinked-kernel
```

**reboot and.....**

**..... ethernet, sound and sensor are back**

**many many thanks!**
