Problem after install DP4 and Beta 2 on Ozmosis

Beitrag von „mosconi“ vom 7. August 2015, 16:28

Thank you crusher

just added

```
<key>csr-active-config</key> <data>ZwAAAA==</data>
```

on my Default.plist then boot and on terminal:

```
sudo touch /System/Library/Extensions  
sudo kextcache -prelinked-kernel
```

reboot and.....

..... ethernet, sound and sensor are back

many many thanks!
