## **BIOS (unwiederruflich) defekt nach BIOS Update (Ozmosis Z87X-UD5H) ?**

**Beitrag von „nikoZ“ vom 24. August 2015, 21:56**

Use "Dual BIOS" feature like this to recover your motherboard:

1. Shut your PC down
2. Hold the power AND the reset button for about 10 sec, than release.
3. Backup BIOS should kick in anytime soon now.
