Ozmosis 1749 Flashing Question [English]

Beitrag von „neoyoli“ vom 14. September 2015, 02:09

Hi guys!

I decided to re-flash Ozmosis, because the BIOS setup got frozen a couple of times, and I want to make sure everything works fine before I install El Cap. However, I don't have a dedicated GFX card anymore, only HD4000. My question is, with a freshly flashed Ozmosis, will I get picture from the screen, to setup the BIOS, without a GFX card? I guess the answer should be yes, I just want to make it sure.

Thanks in advance!
