Erledigt New Ozmosis version ? - English Discussion.

Beitrag von „diedo" vom 29. September 2015, 13:54

Hi, I want to know when and where about of ozmosis, i've been using it for almost a year and it's been a great bootloader for my motherboard Z87X-D3H

These days as all of you know El Capitan had new security and it doesn't allow ozmosis to inject kexts.

I really (badly) want to know when it will be released and wether they fixed the known issues with USB/security or not.

I'm sorry for starting the thread in english, i don't know french and i can't speak it.

Thanks.
