

Erledigt

Snow Leopard Install DVD/ WLAN Problem

Beitrag von „Arsakuni“ vom 4. Oktober 2015, 09:14

Habe herausgefunden, das man die ZIP Datei so lassen muss, damit SL es lesen kann. Das zeigt nun Kext Utility.

```

-- Kext Utility x64 for MAC OS X --
v2.4.2 © cVad 2009.
- Repairer kexts permissions -
- mkext Packer/UnPacker -
- kexts Installer -

Start working: Sun Oct 4 09:11:41 CEST 2015
Detected ... MAC OS X "Snow Leopard".

Task: Full service for "/System/Library/Extensions"
and "/Extra/Extensions" folders.

Repair Permissions for "/System/Library/Extensions" ..... Done.
-- Total processed: 6710 files (316 kexts) for 24 sec.
Preventive removal sleepimage file ... Done.

Updating "Snow Leopard" system caches ..... Done.
-- Build time = 9sec.

Search "/Extra/Extensions/" folder ... Not Found.

Syncing disk cache ... Done.

All done.
Have a nice ... day(night)
Enjoy ...
