wenn du Clover verwendest muss die SSDT nach /efi/efi/clover/acpi/patched kopiert werden. Der Ordner Extra existiert nur bei der Verwendung von Chimera/Chameleon

Ich habe dies im Terminal erhalten:

```
Scope (_PR_) {220 bytes} with ACPI Processor declarations found in the DSDT (ACPI 1.0 compliant)
```

```
Generating ssdt.dsl for a 'iMac15,1' with board-id [Mac-42FD25EABCABB274]
```

```
Haswell Core i7-4790K processor [0x306C3] setup [0x0705]
```

```
With a maximum TDP of 88 Watt, as specified by Intel
```

```
Number logical CPU's: 8 (Core Frequency: 4000 MHz)
```

```
Number of Turbo States: 4 (4100-4400 MHz)
```

```
Number of P-States: 37 (800-4400 MHz)
```

```
Injected C-States for CPU0 (C1,C3,C6,C7)
```

```
Injected C-States for CPU1 (C1,C2,C3)
```

**Warning:** 'system-type' may be set improperly (1 instead of 2)
