

Erledigt Bios flashen misslungen

Beitrag von „al6042“ vom 10. Januar 2016, 22:54

Auf der Seite 22 Eurer Anleitung gibt es folgende Info:

1-8 Onboard Buttons, Switches, and LEDs

BIOS Switch and BIOS LED Indicators

The BIOS switch (BIOS_SW) allows users to easily select a different BIOS for boot up or overlocking, helping to reduce BIOS failure during overlocking. The SB switch allows enabling or disabling of the Dual BIOS function. The LED indicator (M BIOS_LED/B BIOS_LED) shows which BIOS is active.

BIOS Switch:

BIOS_SW

- 1: Main BIOS (Boot from the main BIOS)
- 2: Backup BIOS (Boot from the backup BIOS)

SB

- 1: Dual BIOS
- 2: Single BIOS

BIOS LED Indicators:

- M BIOS_LED (The main BIOS is active)
- B BIOS_LED (The backup BIOS is active)

Wie sind die Schalter bei Euch eingestellt, bzw. welche LED leuchtet MBIOS oder BBIOS?
