**[English] I need some help with El Capitan and Z77X-UD5H and Ozmosis. This is the best place, but I don't speak German. Can anyone help?**

As I have the same board & CPU I'd like to share the Clover-method that worked perfectly for me: <https://github.com/theracermas...gabyte-GA-Z77X-DSDT-Patch>

It's a complete guide with scripts for Bios-Configuration, USB-Installer and Clover-Configuration.

Have fun!
