Gigabyte Rev1.1 Z77P-D3 encounter problems

Beitrag von „al6042“ vom 10. Februar 2016, 07:52

That should be the case, but as you might already guessed yourself, there is no warranty for that.

Since I don't have your hardware at home and I also don't know which already installed kexts or tools might disturb or hamper your effort, I only can keep my fingers crossed.
