Falsches SMBios?

Beitrag von „Mareko“ vom 18. Februar 2016, 13:46

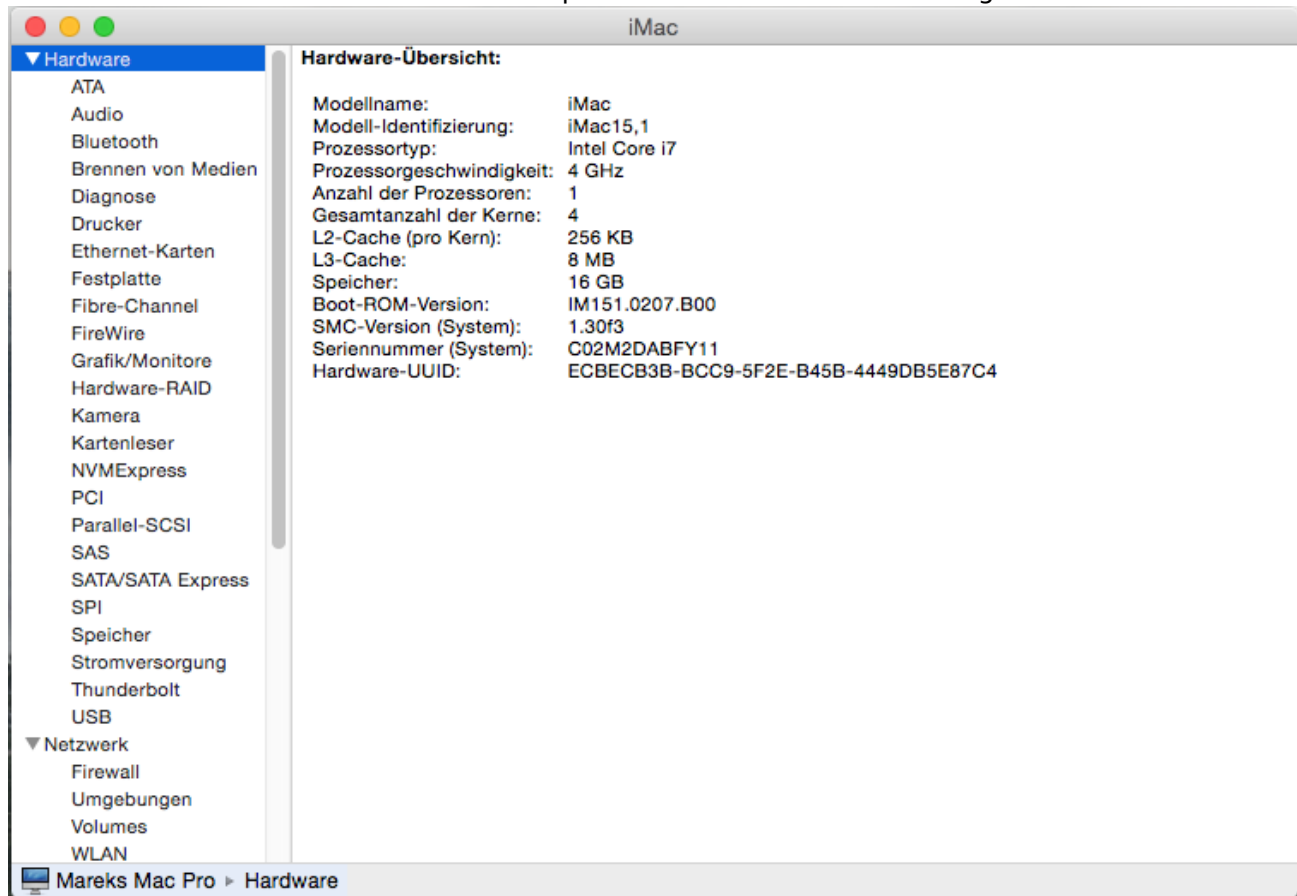

Hey Hey, ich dürft mich alle gerne beraten 😊

also im Terminal hab ich folgendes eingegeben:

```
NVRAM 4D1FDA02-38C7-4A6A-9CC6-4BCCA8B30102:BaseBoardAssetTag="Base Board Asset Tag#"
NVRAM 4D1FDA02-38C7-4A6A-9CC6-4BCCA8B30102:BaseBoardSerial=C02M2DABFY11

```

die Daten habe ich mir über Clover geholt mit der Einstellung iMac 15,1, die Einstellung schien

mir am ehesten zu meinem Prozessor zu passen. Er hat es wohl auch angenommen:

Davor war es ein Mac Pro, wie man noch am Namen erkennen kann 😄

Sollte ich wieder auf Mac Pro stellen?
