## OZMOSIS REQUEST THREAD / Ozmosis Anfragen [1. Beitrag beachten!]

Beitrag von „crusher“ vom 21. Februar 2016, 14:26

Look what say [@al6042](#).

But I dont like Kext Utility he add rootles=0 in NVRAM.

Better use KextWizard.

[@al6042](#) he give a good answer for disable [SIP](#).

Put Defaults.plist in EFI/OZ and reset NVRAM Command(WIN)+Alt+P+R
