VoodooHDA bei ALC892 und seine Probleme

Beitrag von „crusher“ vom 1. März 2016, 14:59

Try this ROM, but in this ROM you dont have a OzmosisHorizontalTheme I attach theme and you put in EFI/Oz folder and reset NVRAM.

If you use this ROM you must remove your vHDA from S/L/E or E/E or EFI/Oz/Darwin/Extensios/Common.

After you dont have a problem with your sound. Always work and after sleep. 😄
