Lenovo U430 Touch: Airdrop mit AzureWave BCM94352HMB erkennt iOS Geräte nicht & umgekehrt

Beitrag von „al6042“ vom 17. März 2016, 23:56

Kann ich dir nicht sagen, da die Info bei mir nicht angezeigt wird:

Aber ich habe was in dem Script der App gefunden:

Code

1. macCompatibilityList=("iMac10,1" "iMac11,1" "iMac11,2" "iMac11,3" "iMac12,1" "iMac12,2" "iMac13,2" "iMac14,2" "iMac7,1" "iMac9,1" "MacPro5,1" "MacBook5,1" "MacBook5,2" "MacBook6,1" "MacBook7,1" "MacBookAir3,1" "MacBookAir3,2" "MacBookAir4,1" "MacBookAir6,1" "MacBookPro11,1" "MacBookPro5,1" "MacBookPro5,2" "MacBookPro5,3" "MacBookPro5,4" "MacBookPro5,5" "MacBookPro6,1" "MacBookPro6,2" "MacBookPro7,1" "MacBookPro8,1" "MacBookPro8,2" "MacBookPro8,3" "MacBookPro9,2" "Macmini3,1" "Macmini4,1" "MacPro3,1" "MacPro4,1") #Macs that were tested successfully (may require a hardware upgrade)

Wie du siehst ist dort das MacBookAir6,2 nicht vertreten.
