Suche: AppleHDA (v274.7) gepacht für RealtecALC1150 - GA-Z97X-UD3H

Beitrag von „Alexco“ vom 29. März 2016, 11:07

Interesting topic.

But this does not work for me. I use the release kext and installed it in /s/l/e. And I use a DSDT with HDA patch from Mirone´s AppleHDAPatcher.

But after reboot, I still have no sound. Using the patched kext from the patcher works.

Using Clover and ALC 1150 codec. Can someone point me to the right direction?
