El Capitan 10.11.4 Problem mit Ozmosis?!

Beitrag von „tkempf“ vom 8. April 2016, 12:50

thank you for your answer Crusher,

it's good to know, how i can change the EFI Partition with terminal...

but with a completely new built system (empty hds) i can't boot at all with 10.11.4.

I still have to keep a 10.10 bootstick araound to get into terminal and follow your instructions.

Thankyou anyhow!

Tom
