

Internet Speedtest

Beitrag von „griven“ vom 9. Mai 2016, 23:41

Cooler Tool 😄

Hier mal mein Output

Code

1. Retrieving speedtest.net configuration...
2. Retrieving speedtest.net server list...
3. Testing from Unitymedia NRW GmbH (178.201.61.139)...
4. Selecting best server based on latency...
5. Hosted by myLoc managed IT AG (Duesseldorf) [45.22 km]: 15.626 ms
6. Testing download speed.....
7. Download: 87.44 Mbit/s
8. Testing upload speed.....
9. Upload: 4.91 Mbit/s
10. Share results: <http://www.speedtest.net/result/5312679153.png>
11. Done!
