Umrüstung eines vorhandenen Win7-PCs auf OSX-Kompatibilität (sinnvoll?)

Beitrag von „hacker1969“ vom 14. Mai 2016, 00:10

Bootloade ist clover:

A screenshot of the Clover bootloader boot screen. The text is white on a black background. It displays the following information: 'About', 'Clover Version 2.3k', 'Build: 2016-04-06 20:59:39', 'Based on EFI (c) 2006-2010 Christoph Pfisterer', 'Portions Copyright (c) Intel Corporation', 'Developers: Dllce, daniel, spianta, JICA, jove, mack2, nathe, nt', 'Credits also: Kabyi, pcj, jadrin, Blackops, STIVIB, TCR.ku, ProdeKony, skoczi, skazybiady, Gack409, kealle, opain, sthlsman, nme42, sheslocke, Demit477, sthlsml, TheAcetBartek, solstice, oedipus001, project00k.com, applelife.ru, susanlymac.com', 'Running on: EFI Revision 2.60, Platform: x86_64 (64 bit), Firmware: CLOVER rev 3423, Screen output: graphics output (UEFI), 1280x1024', and a 'Return' prompt at the bottom.
