

ElanTouchpad / SmartTouchpad

Beitrag von „al6042“ vom 15. Mai 2016, 13:12

Und hier mal noch eine aktueller Version des Kexts, der von ElanTouchpad zu SmartTouchpad umgetauft wurde...

Tolle neue Funktionen und Änderungen:

- Fixed CapsLock key change plist option
- Fixed a firmware bug in ELAN v3 hardware
- Updated driver to accept new revisions of ELAN Touchpad to be recognized as Version 4
- Added plist option to disable the touchpad when LID id closed (Enable back auto when its opened)) which will stop strange behavior from touchpad when using HDMI in some systems.
- Pointer acceleration enhancements (new plist options to control)
- Partial support for the extra buttons and track point from Synaptics trackpad
- Improved support for synaptics
- Updated documentation for features
- Several minor bug fixes and optimizations
