## **Erledigt** **Filme iTunes**

**Beitrag von „griven" vom 2. Juni 2016, 00:15**

Shiki.kext is just about DRM VideoPlayback it won´t fix AppleMusic issues by now. To listen to BeatOne all you need to do is to authorize your Computer for iTunes. Open Up iTunes klick on Account and select authorize -> authorize this Computer you´ll be prompted to input your AppleID and Passwort. Once done you´ll get an info screen showing your already authorized Machines and in case of success you´ll be notified that your Computer is now authorized to playback DRM protected Music. Just go ahead an listen to BeatsOne...
