OZMOSIS REQUEST THREAD / Ozmosis Anfragen [1. Beitrag beachten!]

Beitrag von „renza“ vom 11. Juni 2016, 05:39

Much appreciated. Still need to inject nvme for my windows drive, but will try after that

Are you able to explain how you made volume 1 smaller, and made volume 2 larger to be able to fit the ozmosis modules? This is where i got stuck. Thanks

edit: Managed to load it on all good. How do I access the Ozmosis interface? I can (attempt to) boot from os x installer usb drive using the normal boot selection menu, but no way to get into ozmosis gui.
