

# HP Z820 Workstation + Mac OS X Yosemite/El Capitan

**Beitrag von „crashT“ vom 16. Juni 2016, 07:37**

hi ibnahmed, ist nice to read your post, so there are still a number of people who try it with a z820.

I can also see only one memory board with 8 slots and my clock speed is limited to 2,59 GHz for E5-2670 2.6GHZ.

We have the same CPU's. My Hardware Configuration is a iMac14,2. No USB3, FireWire. Grafik - NVIDIA GeForce GTX 970.

can you upload your fresh dsdt.aml and SSDT.aml or the complete clover folder? Thank you
