

HP Z820 Workstation + Mac OS X Yosemite/El Capitan

Beitrag von „ibnahmed“ vom 16. Juni 2016, 11:09

CrashT,

Thanks for your reply.

I have uploaded the clover folder. The original DSDT and SSDT are there along with patched ones from given post.

Looking forward to someone editing this and we get all the memory channels and also turbo boost support.

Current geek bench score is 30k, i know it can get to 37k with turboboost.
