## **Help in ALC887-VD layout injection to DSDT [English]**

**Beitrag von „al6042“ vom 11. Juli 2016, 21:27**

Find the entry "Device (HDEF)" and add the sequence in there...

The layout-id in your spoiler is set to 6, make sure you change that to 5.

On the other hand you could easily use Clover instead of a DSDT.

Open your config.plist with the Clover Configurator, goto ACPI and activate the FixHDA, then go to devices and type the number 5 in the field Audio Inject...
