HOW TO FLASH DELL LATITUDE E6520

Beitrag von „lovemyimac78“ vom 14. Juli 2016, 22:00

Hi to all fellow hackintoshers new around here can anyone help me i have managed to place ozmosis files into dell e6520 bios but dont know how to flash it as dell use EXE file to do it tried with fptw64 this is error i get

Error 280: Failed to disable write protection for the BIOS space

please can someone help thanks
