Hilfe fix DSDT for ASUS S551LN

Beitrag von „LRous“ vom 31. Juli 2016, 13:38

Yes, English is easier 😊 I added in the signature "hardware". The DSDT I need to fix only 15 errors, since I can not use patches from MaciASL. My discrete graphics card does not work(GT 840M),so I'm using the built-in graphics intel 4400 HD. Nvidia graphics I disabled using SSDT. Network module does not work, so I ordered another from China. IOReg at the moment I can not take off because of the lack of a laptop, it is my wife
