iMessage - Stand der Dinge (Mitte Januar 2015)

Beitrag von „MacGrummel“ vom 2. August 2016, 03:49

Just 3 questions:

Did you use other values before?

Is your Network LAN shown as En0?

Is your original Mac closed at that time?

If you use the iMessageDebug the first 6 values should be the same on Hack and Mac. It's not the best way, but would run. It may be a better idea to use all new values, made by CloverConfigurator..
