@ JoeHidden and @ zebulond

Hello guys, sorry for the english language but i don't speak german. Would you guys share your EFI partition, please? I have X99-A II with 6900K, but I can't reach the install window. I'm getting a bit tired. Trying all over the forums.

Need to run El Capitan 10.11.6. No Sierra, for now.

Your EFI folder would be great appreciate. Thanks in advance.

G.
