## **Problem MSI Z87 G43 Gaming**

**Beitrag von „al6042“ vom 26. August 2016, 22:48**

Check out the attached DSDT.

Put it on your hidden EFI-Partition in the folder /EFI/Oz/Acpi/Load.

Also, grab the [AppleALC.kext in the Version 1.0.12](#) and install it with the Tool [Kext Utility](#).

Then reboot and see:

1. if Analog and HDMI Audio is working
2. If black screen issue is still happening...
