Erledigt **Problem MSI Z87 G43 Gaming**

Beitrag von „Cuccheis" vom 27. August 2016, 12:13

Wait, now i rebooted and audio work! But i can't manage it .. if i go to Option -> Audio, i can listen the sound both in HDMI and analog! But if i press sound key from keyboard, i see the denied logo under volume logo.

Cuccheis

EDIT : Added my config.plist
