Hallo !!

First of all, I don't speak Deutsch. Sorry.

I'd like invite you all to [my full guide of z820 and el Capitan](#). It's the result of a lot of hard work to get running El capitan on my Z820.

The reason of this post is because I saw here the tip for fix the usb issue on install. It was the end of the long and black tunnel 😊 And I'd like express my gratitude sharing with you all my guide.

I hope you join, share and have fun.

dank!!
