

Erledigt Sierra GM Release - Eure Erfahrungen?

Beitrag von „Reprise80“ vom 10. September 2016, 13:47

[@Patricksworld](#) das problem hatte ich zuerst auch, bei mir lag es daran das die version zu alt war, neuste geladen drübergehauen und zack es lief 😊
doch nun kriege ich ein kernel panic wenn ich normal starte... kann nur im safe mode booten

```
