## Kein Bild mit GTX 660 und GM Sierra

Beitrag von „kzverev“ vom 29. September 2016, 11:09

Hello I am new in hackintosh. I download ready ozmosis bios for my mothrboard GA-z87x-ud5h. I pulled out my GTX660Ti and install macOS Sierra on buit in video in my i7-4770 HD4600. Its install nice. LAN works and I am happy. But sound dosnt work(audio outputs not found) and when i install my GTX660 system freeze on boot. Please help me what I need to do for my GTX660TI works and how i can install sound Please step by step gude or useful link. Its all I need to completley happy with my PC)

My CONFIG

GA-Z87x-UD5H

i7-4770

16 GB Trident X Gskill

M2 240 GB Kingston HyperX Predator
