Erledigt Z97X-UD3H & GTX 760

Beitrag von „pinaudnico" vom 2. Oktober 2016, 21:00

No. graphic card is good selected. No internal, my hack work like that for about one year. The picture is on the GTX 760. I agree with you 14.2 will be the best choice but how to change it ? My SIP is also desactivate, because it doesn't start if it is activated. Thanks for your help.
