

GA-B75M - D3H OSMOSE

Beitrag von „Fredde2209“ vom 28. Oktober 2016, 15:13

[@Sofista](#) you can also use Ozmosis to boot into Windows. The HermitCrabLabs wanted to create a boot loader that could boot all operating Systems available on the market. The final product was Ozmosis! But if you don't want to have Ozmosis anymore, you can just use Q-Flash to flash the original Bios again 😊
