Onboard-Audio von 2.0 auf 5.1

Beitrag von „al6042“ vom 20. November 2016, 11:28

So, what is the idea of having a 5.1 output with two speakers?

The guide expects to have speakers connected to several outputs to create the 5.1 aggregate.

BTW: are you sure you have a GA H81M-DH3? I cannot find any Gigabyte Product page for that board.
