Onboard-Audio von 2.0 auf 5.1

Beitrag von „Alessandro Carlini“ vom 20. November 2016, 11:47

ga-h81m-hd3 sorry....however, I have connected to the hackintosh 3 center / sub cables, rear, and front speakers. But Sierra recognizes only the front cable. If I'm going to create with midi 5.1 channel I feel only the two front speakers
