Erledigt Acer Swift 3

Beitrag von „al6042" vom 12. Dezember 2016, 22:44

Hi @ioreknanou and welcome to the forum... 🙂

your laptop looks really cool...
Since the HDMI Audio is connected to the HD520, which I guess is in your box, there is currently no known solution to get it working.
Do you know the AudioCodec running in your machine?
Which kext are you using for Audio?
If AppleHDA, which Layout-ID did you inject?
Is the internal or the external mic not working?
We have a helpful thread for SD Card Reader issues, but it's currently only in german.
And the Fingerprint print reader will not work, since Apple never used such a device...
